GLM BRANDING · JOB DESCRIPTION

General Manager

Runs the business end to end — sales, production, stock, finance and people — and is accountable for profit, cash and compliance.

Job title	General Manager (role *General Manager* in the GLM POS & Accounting system)
Department	Management
Reports to	_____ (owner / board — management to confirm)
Direct reports	_____ (e.g. Finance Manager, Supervisor, Front Office, Sales employees — management to confirm)
Pay basis	As set out in your contract of employment, through payroll with statutory deductions.
Hours, leave, probation	_____ (as set out in your contract of employment)

1 Purpose of the role

The General Manager is accountable for the whole business: that it sells at the right prices, makes what it sells on time and to standard, buys well, collects its money, pays what it owes when it is due, and makes a profit. You set direction with the owner, lead the Finance Manager, Supervisor, Front Office and sales team, take the decisions that need seniority, and use the system's reports to see where the business stands and where to act.

2 Key responsibilities

PROFIT AND PERFORMANCE

- Review the **Profit & Loss** (accrual and cash) and **Reports → Sales by Business Head** every month: sales, cost and margin for DTF, UV, embroidery, large format and laser. Decide where to push, reprice or stop.
- Review **DTF → Dashboard** (roll profit, wastage, what discounts cost) and **Reports → Embroidery Profitability**.
- Set targets with the owner and track them; keep the monthly sales floor and the sales team's results in front of the sales staff.

SALES AND PEOPLE

- Review staff results in **Commission → Team & payouts** and the **Monthly report**; coach anyone marked **needs improvement** and agree a plan with them.
- Approve each month's commission so pay-band staff go into payroll **before payday (the 5th)**; recommend any change to the bands, target or minimum wage to the Admin, who alone sets them.
- Lead, coach and appraise your direct reports; recommend hiring, role changes and training.

OPERATIONS: PRODUCTION, QUALITY AND DELIVERY

- Oversee the production queue and who is assigned what (**Production**), including outsourced jobs and suppliers; keep promised delivery dates.
- Review **Quality Control** results: pass rate, failures and rework; act on recurring defects.
- Manage supplier relationships and costs; review the quotes and mark-ups on contracted-out work.

STOCK AND PURCHASING

- Act on reorder alerts; approve or reject purchase requisitions (never your own); review purchase reconciliation variances and stock-take differences.
- Keep the import and purchasing decisions (e.g. China imports) inside what the landed cost and margin allow.

MONEY AND COMPLIANCE OVERSIGHT

- Review receivables ageing and payables, cash flow and the petty-cash position; decide on credit terms for corporate clients.
- Make sure statutory payments are made on time: PAYE, SHIF and the housing levy by the 9th, NSSF by the 15th, VAT and withholding tax by the 20th, and income-tax instalments — the monthly **Compliance → Payments due** total is the cheque to write.
- Review the VAT position, the corporation-tax or turnover-tax schedule and the payroll with the Finance Manager.

APPROVALS AND CONTROL

- Decide DTF artwork and embroidery price approvals and discount exceptions, never for work you captured yourself.
- Approve (as the second person) expense, payroll and petty-cash amendments and deletions raised by others; never approve your own.
- Keep the controls working: segregation of duties, supporting documents, and follow-up of exceptions. Ask the Admin for the audit log and for backups to be confirmed.

---

3 Authority and limits

What you can do in the system is set by your role and is checked on the server at every request.

YOU CAN

- See every order and every report
- See supplier costs and mark-ups
- Open Finance, Compliance, Accounting and Reports
- Assign and manage production; open Quality Control
- Approve stock requisitions
- Manage DTF rolls, costs and price approvals
- Approve commission months and payouts
- Capture expenses, payroll, quotations and invoices

YOU NEED A SECOND PERSON FOR

- Amending or deleting an expense, payroll entry or petty-cash top-up you raised
- Receiving a purchase you captured
- A price approval or requisition you raised yourself
- Anything involving your own pay

YOU CANNOT

- Open Master Data: staff, roles, price lists, discount rules, company details, integrations, backups, security
- Change commission bands, target, minimum wage or payday (Admin only)
- Approve your own requests
- Delete a recorded sale

4 Performance measures

Measure	What is looked at
Profitability	Net profit and margin, in total and by line of business (P&L, Sales by Business Head).
Sales	Total net sales against target; the share of the sales team at or above the monthly floor.
Cash and collections	Cash position; receivables ageing; amounts overdue; petty cash never short.
Delivery and quality	Orders delivered on time; quality-control pass rate; rework and rejected units.
Stock	Stock-outs avoided; purchase and stock-take variances; reorder alerts acted on.
Compliance	Every statutory payment and return made by its date; no penalties.
Control	Approvals turned around promptly; no self-approval; books check clean at month-end.
People	Team performance, retention and development.

5 Remuneration

- Your pay is set out in your contract of employment and run through payroll each month, with PAYE, NSSF, SHIF and the housing levy deducted.
- Any bonus, allowance or incentive arrangement is as agreed in writing with the owner.

6 Standards and conduct

- **Your PIN is yours.** Never share it, never sign in as someone else, and sign out when you leave the screen.
- **Every record is traceable.** The system records who captured, changed or approved each order, payment, expense and claim; accuracy and honesty in what you enter are part of the job.
- **You set the example.** Follow the same controls as everyone else: no approving your own requests, no off-system money, no exceptions to the pricing rules without a recorded approval.
- **Decisions leave a trace.** Approvals, price exceptions and commission decisions are recorded in the system with your name; make them on the facts.
- **Customer and staff information is confidential** and used only for the work it was given for.
- **Raise problems early** — a wrong figure, a disputed payment, a control that is not being followed — with your manager.

7 Systems and tools you will use

Where	For
Accounting — Profit & Loss, Balance Sheet, Cash Flow, Receivables, Payables	Seeing where the business stands
Reports	Sales, Sales by Business Head, by Category, Embroidery Profitability
DTF	Roll profit, wastage, discounts, price approvals
Commission	Team results, monthly report, approving months and payouts
Production and **Quality Control**	Workload, outsourced jobs, pass rates
Stock	Requisitions, approvals, purchases, reconciliation, stock take
Finance and **Compliance**	Expenses, petty cash, payroll, VAT, Payments due, income tax

8 Typical requirements

- A degree or diploma in business, commerce or a related field, or equivalent experience.

- Experience managing a business or department, ideally in printing, manufacturing, branding or retail.
- Able to read and act on a profit and loss, a cash flow and a receivables ageing.
- Working knowledge of Kenyan statutory requirements: VAT, PAYE, NSSF, SHIF, the housing levy and income tax.
- Leadership, sound judgement, integrity and good communication with staff, customers and suppliers.
